Self-ordering via venue apps helps to reduce wait times. Through the analysis of operational data from guest room sensors, building platforms and staff inputs, hotels can continuously improve sustainability and profitability.

Customers are becoming more environmentally conscious and the use of local products is often an appealing factor for eco-conscious customers. Additionally, create exclusive access opportunities like exclusive events for members, with famous guest bartenders or exclusive concert after-parties.

Health-conscious and non-alcoholic optionsAs health and wellness become an increasingly important concern for many people, non-alcoholic and health-conscious drink options are increasingly popular in bars. Back-

end systems can automate routine tasks, enabling staff to concentrate entirely on providing five-star service during visitor interactions.
